Quality Assurance is an Integral Part of Every Process

Measuring, testing, inspection – quality assurance (QA) is an integral part of industrial production processes, as well as of many non-industrial applications. The range of applications is growing, demands are becoming stricter and the tasks at hand are **complex and diverse**. Economy, quality, safety, the conservation of resources, efficiency and future viability are important issues at many levels. At the same time, these challenges are driving further developments in QA and advancing various technologies. QA measures are essential for all companies and will have a significant impact on their future. Digitalisation and automation offer decisive support in fulfilling requirements for functionality, efficiency and flexible scalability of production processes. An end-to-end quality assurance process is indispensable – inline, automated and AI-based to an ever-greater extent.

More than any other platform, and as the world's leading trade fair for quality assurance, Control focuses on cutting-edge vision technology, image processing, sensors, measuring and test technology, as well as software. The strengths of this globally acclaimed trade fair include its presentation of solutions across all industry sectors, its outstanding technical standards, high levels of internationalism and a pleasant, practice-oriented working atmosphere. **Market competence** is bundled **in full** at Control. The highly practical trade fair concept provides exhibitors and expert visitors with an ideal platform for business, the transfer of technology and personal dialogue.

Give me and take **Control!**

 As a leading international trade fair, Control is the only universal event for industrial quality assurance.

 Control takes production quality to the next level year after year.

 Problems in production are solved before they arise at the world's leading trade fair for quality assurance.

 Quality assurance scenarios are presented at Control, which are frequently ahead of their time.

 Due to the extraordinary competence of its portfolio and its expert audience, Control is at the cutting-edge of the QA industry.

Schall Inclusive

Schall makes trade fairs for markets – significant, internationally established trade fairs which have been around for many decades. With their clear focus on content, each of our technically specialised events is held at an ideally located trade fair venue in Europe's respectively leading technology regions. It's especially important for us to provide exhibitors with clearly defined trade fair offerings, including practical marketing services. After all, agreements are always best when they're simple – and with us **simply everything is included.**

The exhibitor package includes all of the following:

- Unlimited number of co-exhibitors
- Second-storey free of charge
- Free exhibitor IDs depending on booth size
- Unlimited number of expert visitor tickets, digital
- Presence at the exhibitor terminals at the trade fair facility
- Included in the exhibition hall floor-plans at the entrances
- Entry in the trade fair directory
- Nomenclature entries for structured product allocation
- Visitor flyer, printed as well as online in PDF format
- Listing in the exhibitor index on the trade fair website
- Exhibitor-profile with logo, image, video, product overview, product groups, new products, job offerings, social functions and contact data
- Display of new products and trade fair highlights in stream news & stories
- My trade fair day service tool
- YouTube videos with exhibitor statements
- Press releases with exhibitor statements in the press folder
- Agile social media working

Event Figures for 2024

475 exhibitors from 24 countries and 13,149 visitors from 66 countries on 25,000 square metres of overall exhibition floor space.

Strong Visitor Quality

22% decisive role
39% supporting role
27% advisory role

Primary Professional Interests of the Visitors and their Job Functions

85% Measuring technology
33% Material testing
23% Analysis apparatus
15% Optoelectronics
38% QS-systems / service
14% Others

Multiple choice

13% Managing director, board member, head of public office
5% Authorized signatory, Head of main department
23% Head of department, foreman
18% Engineer, design engineer
23% Other employee

Technologies and Decisions for the Future

Quality is no longer just an afterthought at the end of production, it's implemented and integrated throughout the entire manufacturing process. Developments associated with Industry 4.0 have resulted in integration, networking, automated queries and evaluation on a broad scale. And thus QA is becoming increasingly significant because it's a key prerequisite for conserving resources, eliminating errors, reducing scrap and for overall efficiency, as well as for reliability and safety – already during the manufacturing process. The **personal exchange** amongst decision-makers and QA experts at Control provides concrete, implementable solutions for routine operations throughout all industries.

At the international level as well, Control is the most interesting and largest trade fair for measuring, test and inspection technology. It presents **state-of-the-art solutions** for the quality of products, processes and services. Suppliers and users, exhibitors and expert visitors come together here live and in person to exchange views on an equal footing about new developments and challenges in the field of quality assurance. The internationally acclaimed business platform presents all relevant QA topics in a focussed, clear and structured manner, and provides a solid basis for investment decisions. Take advantage of this unique meeting place and be on hand as an exhibitor at the 37th Control in Stuttgart!

Reasons to be Part of #Control2025

- 1** Quality assurance is a continuous optimisation process which affects all manufacturing companies all over the world.
- 2** A highly qualified expert audience meets up with international market leaders and world-class QA suppliers at Control.
- 3** Decision-makers regularly secure competitive advantages by adapting their quality assurance concepts to new technologies each year.
- 4** Experiencing the most up-to-date technologies with all of one's senses and intensive discussions support decision-makers in implementing their investment plans.
- 5** The practice-oriented expert community at the world's leading trade fair it is highly unique and ensures successful business for suppliers and users alike.

Exhibitor Statements & Trade Fair Scenes from #Control2024

 **Stand-Enquiry**

 **Booth Registration**

The concrete and inspiring exchange of ideas between decision-makers and QA experts offers sustainable added value, because personal contact keeps business moving.

Fabian Krüger, Control Project Manager

Fraunhofer

As an integral part of Control's agenda, world-class events which accompany the trade fair are held by **renowned research facilities** of the Fraunhofer Institute, i.e. the Fraunhofer Vision Alliance and the Fraunhofer Institute for Production Technology and Automation (IPA). They support the technology transfer and present developments which are currently ready for use, as well as **forward-looking concepts** for the enhancement of QA in industrial manufacturing.

Fraunhofer Vision Alliance

For many years now, the special show on "Contactless Measuring Technology" has been a well-established marketplace for innovations at the Control trade fair, and an expression of long-term cooperation between Fraunhofer Vision and trade fair promoters P. E. Schall GmbH & Co. KG. Companies and research institutes mutually present a comprehensive selection of the latest systems for contactless, non-destructive measuring and test technology at the special show. The special show helps users to orient themselves within the market despite the continuously increasing **performance and flexibility** of modern systems, as well as penetration into an ever-increasing number of new fields of application.

The Fraunhofer IPA Event Forum

Strong cooperation with the Fraunhofer Institute IPA is equally well established, who will be on hand at Control 2025 with their **internationally esteemed** Event Forum. Issues including trends in quality assurance, digitalisation, automation and AI will without a doubt be well covered at the forum. Beyond this, participants will be provided with the opportunity of identifying and evaluating their own problem areas – after all, the Event Forum focuses attention on the practical implementation of know-how in the field of quality assurance.

Our trade fairs are targeted at industrial practicability. Control is setting the pace where quality assurance is concerned, and it's intended to provide expert visitors with everything they need to excel in international competition with outstanding QA.

Bettina Schall, Managing Director, P. E. Schall GmbH & Co. KG

Start-up Area - for Cutting-Edge Networking

Innumerable start-ups have established themselves in recent years who are **revolutionising** future industrial quality assurance with their **innovative** solutions. As a long-standing event, Control would like to support in particular emerging companies, and provide them with a platform at the industry meeting place at the heart of Europe's leading technology region.

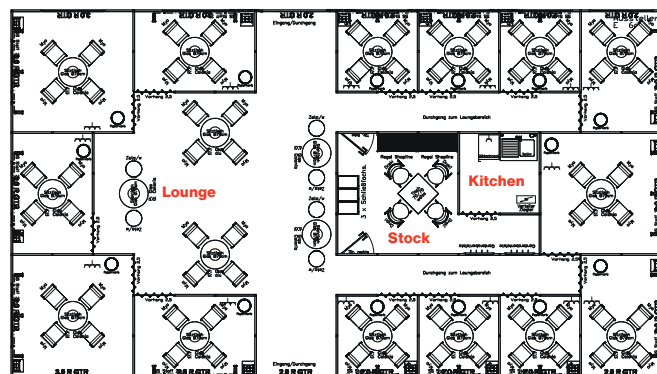

At Control, start-ups can book an attractive all-round carefree package including booth setup and marketing. The prerequisite for participation is simple: exhibited products must be related to industrial quality assurance.
